

AHMED ALI BAIG

SOFTWARE DEVELOPER | UI/UX | GRAPHIC DESIGNER

Profile

I want to channelize my creativity in a productive manner to assist a renowned firm like that of yours in reaching its goals. I have been designing and developing desktop ,web and mobile based applications since 5 years now. Thus this opportunity will give me a platform to showcase my potential. I transitioned to UI/UX Engineering after I pursued my Bachelors in CS and studied courses like Object Oriented Programming, Database development, SQA and Mobile App Development. After working full time jobs (as mentioned in my work experience) in addition to the freelance projects I have done in past I believe my work experience is suffice to excel at the position I have applied for. Priorily I was employed at CNS. I worked on the Front-End of web based banking applications. My work involved visualization of screens and layouts upon gathering the requirements and translating them into mockups, wireframes and HTML markups with end to end functionalities enabled in ASP.NET framework.

Work Experience
